

## On-site Positive Cases

**CASES**

These reflect new cases identified during the previous week. It is possible for the notification to the District to occur in the week after the positive case was in school. Positive case are in “isolation” and not quarantine, so are not included in the blue circles below. A positive case doesn’t automatically result in others being quarantined.

## Quarantine Numbers

The quarantines below are considered to be “close contacts” of a positive case that occurred during school-related activities and don’t include individuals who were exposed outside of school. The numbers reflect individuals that were out at any point during the week but not necessarily the entire five days. Some quarantine counts may carry over from week to week depending on start and stop dates. Some exposures occur on the bus so the positive case may attend a different school than the student who is put into quarantine.

“Close Contact”: a non-vaccinated person who was less than 6 feet from a positive case cumulatively for 15 minutes and must quarantine

**Exception to “Close Contact”:** K-12 students between 3 and 6 feet from a positive student cumulatively for 15 minutes while engaging in consistent wearing of a well-fitting mask. These students do not need to quarantine. While riding on a bus, the distance is 6 feet regardless of mask use.
